Rain Old Jupiter Pluvius takes fiendish delight in ruining poorly protected buildings. At every little crack or bare spot in the paint, the rain soaks in and spreads rot through the wood.

To last, your buildings must be as waterproof as a staunch boat. They will be, if well coated with paint made of Dutch Boy White-Lead thinned with pure linseed oil.

Before the next rain, call on us about painting and painting materials. We expect you. If you can't call, phone or write.

GROTON

Patriotism and Production. This is the year, if there ever was one, when country people must do their utmost to produce adequate food supplies.

The following quotation is taken from the statement of the state committee on food production and conservation:

"The world's wheat crop is below normal. The Argentine wheat crop is a failure. The Australian crop is so remote that its effect on world supplies is less than usual."

"The prostrate countries of Europe must depend on the United States for a part of their supply if they are to escape starvation. All of which means that the shortage of food will have a definite reaction in the United States, and prices will be high, even though supplies may with care be augmented."

"To encourage the production of staple foodstuffs by farmers, and to assist in locating and making available supplies of fertilizer, seed, labor, etc."

"To encourage the output from boys' and girls' gardens; to increase their interest in corn and potato growing, and in raising and swine raising."

"To encourage the planting of gardens by wage-earners, where conditions are favorable."

"To encourage the saving of surplus garden products and fruits by home-canning."

"To encourage more economical purchase of food-stuffs, and to urge the preservation of waste."

"To encourage better distribution. Give your bit—this means all of us. Each community cannot do its share unless each individual in that community does his or her share."
